TRAININGS

Department of Computer Science & Engineering Guru Nanak Dev Engineering College, Ludhiana
Multi-Language Compiler Web App August 2025 - Present

- Building a compiler that supports C, C++, Python, and Java using ReactJS (frontend) and FastAPI (backend).
- Integrating graphics support and Python libraries for enhanced execution features.
- Implementing core modules including code execution, error handling, and output visualization.

Council of Scientific & Industrial Research - Central Mechanical Engineering Research Institute(CSIR-CMERI) Ludhiana, Punjab
Machine Learning June 2024 - July 2024

- Learned basic machine learning and used Python libraries like NumPy, Pandas, Matplotlib and Scikit-Learn.
- Built a Sonar/Mine Detection model to classify sonar signals as mine or rock.

PROJECTS

Online OTR (One Time Registration) System

Implemented using the MERN stack and integrated Tesseract.js for real-time OCR processing. The system extracts and validates OTR numbers from uploaded images. Features role-based authentication with faculty and student dashboards—faculty can track, review, and verify student OTR submissions.

Rent Management System

A PHP–MariaDB-based platform for managing tenants/shops, tracking monthly rent, generating receipts, and handling data through intuitive forms, dynamic tables, and a secure login system.

Retail Sales Dashboard

Cleaned and analyzed sales data using Excel. Built Power BI dashboards showing trends, regions, top customers. Included interactive visuals to support business insights and decision-making.
